

Q/P MANAGEMENT
GROUP, INC.

Free Webinar

Wednesday January 13, 2010 - 11:00 am ET
45 Minute Presentation - 10 minutes Q/A

Presented by
Lori Holmes, Director

Measuring Maintenance Activities within Development Projects - Impact Points

Although function points (FP) are a good measure of the functionality that is added, changed, or removed through a development project, they do not measure other functions that may be impacted by a specific change but are not actually changed themselves. There is often work that is done in a project separate from the FP measurable functionality that cannot be counted under the current International Function Point Users Group (IFPUG) rules. Q/P Management Group, Inc. recognized, along with our clients, that something was needed to measure the impacted functions not covered by IFPUG counting rules. The method that has been developed to address this need has been named Impact Points (IP).

Agenda

- Describe why Impact Points are deemed necessary
- Present the concepts of Impact Points and how they were developed
- Provide Examples of Impact Point Counts
- Present Implementation Considerations and Recommendations
- Q/A

Space is limited for this event and will be reserved on a first-come basis.
